

Did You Know...

THE BEST WAY IN, IS NOT ALWAYS THE BEST WAY OUT

Sometimes safety is about quickly getting away from an unsafe situation.

That is why it pays to know your exits.

Chances are you are aware of the exits from your home or workplace. But what about stores where you shop, the public building you enter, the venues you take your family to or the hotels where you stay?

As part of our working responsibilities we attend different jobs sites and locations on a regular basis. Get in the habit of always locating the emergency exit wherever you are. If you know exactly where to go, you'll get there a lot quicker.
