

# Did You Know...

## Hidden Hazards – Snow

Due to snowy weather conditions most hazards tend to be hidden or buried underneath the snow.

Please follow the necessary steps to prevent incidents as a result of hidden hazards on your worksites.

- Perform daily risk assessment before the start of work
- Clear the area regularly; stay clutter free
- Avoid using makeshift step-ups
- Ensure you have a clear line of vision
- Ensure all routes from trailer to work station are/is clearly visible
- Ensure that work area is free from overhead hazards created by ice buildup
- Clear out snow from pathway and driveway
- Ensure that your work area has some traction; sand is great for this.
- Ensure material storage area is well organized and clearly demarcated

Pathway of sand for traction
