## WINTER DRIVING TIPS: PREPARE THE VEHICLE

### LIGHTS

Check your headlights, brake lights, turn signals, emergency flashers and interior lights. Be sure to also check any trailer brake lights and turn signals, if necessary.

### WINDSHIELD WIPERS

You can quickly go through a lot of windshield wiper fluid in a single snow storm. Make sure your vehicle's reservoir is full of high-quality 'winter' fluid with de-icer before winter weather hits. Make sure defrosters and all windshield wipers work and replace any worn blades. Consider installing 'heavy duty' winter wipers if you live in an area with lots of snow and ice.

### COOLING SYSTEM

Make sure you have enough coolant in your vehicle, and that it meets manufacturer's specifications. Check the cooling system for leaks, test the coolant, and drain or replace old coolant.
